## **We are implementing a lending service to increase your CAICA COIN holdings!**

Our group is committed to enhancing the services of CAICA COIN (hereafter referred to as "CICC"), expanding its holder base, and promoting circulation, with the aim of increasing the value of CICC through various measures. This time, we have decided to re-implement the CICC lending service, which was particularly well-received among our past campaigns and services.

In preparation for the launch of the service, we plan to solicit customers willing to lend their CICC. More details will be announced at a later date. Please look forward to further updates!

CICC is a cryptocurrency issued by our company and is listed on the domestic cryptocurrency exchange Zaif, as well as the international exchange FinexBox.

As the issuer of CICC, our company upholds the concept of "Supporting Japan's GameFi on Multi-Chain" through CICC, aiming to form a GameFi ecosystem. We are committed to fostering an environment where businesses can confidently participate in the GameFi sector.

Furthermore, we support various chains used in GameFi and are advancing the utilization of CICC by collaborating with diverse GameFi projects on each chain.

This includes our partnership with CAICA Financial Holdings Co., Ltd., a subsidiary of our company, which operates the curated NFT launchpad "Zaif INO."

The coin is evolving into a multi-chain compatible coin, with Polygon support completed in September 2023, allowing users to utilize CICC on the Polygon chain.
